PROFESSIONAL SUMMARY

Python and Django developer with 6+ months of hands-on experience building RESTful APIs and full-stack web applications. Proficient in Django, Django REST Framework, and FastAPI, with ORM-based database experience using PostgreSQL and SQLite. Skilled in building authentication systems, role-based access control, and CRUD applications, with deployment experience on PythonAnywhere and version control via Git/GitHub. Detail-oriented and focused on writing clean, maintainable, scalable backend code.

TECHNICAL SKILLS

Languages: Python

Frameworks & Libraries: Django, Django REST Framework (DRF), FastAPI

Databases: PostgreSQL, SQLite, Django ORM

API Development: RESTful API Design, CRUD Operations, Authentication & Authorization, Role-Based Access Control (RBAC)

Tools & Deployment: Git, GitHub, PythonAnywhere, Postman

Concepts: MVC/MVT Architecture, Object-Oriented Programming, Version Control, Backend Debugging

PROFESSIONAL EXPERIENCE

Junior Backend Developer — Independent Self-Directed Projects

Oct 2025 – Present

Lahore, Pakistan

- Designed and developed backend web applications and RESTful APIs using Django, Django REST Framework, and FastAPI across multiple independent projects.
- Modeled and managed relational databases using PostgreSQL and SQLite, leveraging Django ORM for efficient, secure data handling.
- Implemented user authentication, authorization, and role-based access control to secure application endpoints and protect user data.
- Built and tested CRUD-based features and API endpoints, ensuring reliable request handling and data integrity.
- Deployed and maintained live applications on PythonAnywhere, managing environment configuration and troubleshooting production issues.
- Used Git and GitHub for version control, maintaining organized commit history and project documentation.

PROJECTS

HR Portal — Role-Based Access Control System | *Django, Django ORM, Authentication*

- Built a role-based HR management system in Django supporting distinct admin and employee permission levels.
- Implemented secure authentication and access control logic to restrict data visibility by user role.
- Designed database models to manage employee records, departments, and access permissions.

Python Q&A ChatBot | *Python, Rule-Based NLP*

- Developed a domain-specific chatbot in Python to answer Python programming-related queries.
- Implemented response filtering logic to keep answers scoped to relevant, accurate domain content.

Todo App with User Authentication | *Django, Django ORM*

- Built a full-stack task management application with secure user registration and login.
- Implemented complete CRUD operations, allowing users to create, update, and delete personal tasks tied to their accounts.

Blog Posting System | *Django, Django ORM*

- Developed a full CRUD blogging platform enabling users to create, edit, and manage posts.
- Structured Django models and views to handle post ownership, storage, and retrieval efficiently.

EDUCATION

Bachelor of Business & Information Technology

2023 – Present

Virtual University of Pakistan, Lahore, Pakistan

CERTIFICATIONS

- Python Essentials 1 — Cisco Networking Academy / Python Institute (April 2026)
