PROFESSIONAL SUMMARY

Junior Python / Django Backend Developer with **6 months of professional backend development experience** at **Nexrupt Technologies**. Proven expertise in engineering robust backend architectures and scalable **RESTful APIs** using **Python**, **Django**, and **Django REST Framework (DRF)**. Hands-on experience in relational database development with **PostgreSQL**, **MySQL**, and **Django ORM**, implementing secure **JWT authentication**, **Role-Based Access Control (RBAC)**, **CRUD operations**, and core backend business logic. Skilled in designing clean API endpoints, optimizing database queries, and utilizing Postman for systematic API testing and debugging in agile team environments.

TECHNICAL SKILLS

Languages	Python, SQL
Backend Frameworks	Django, Django REST Framework (DRF), FastAPI
API Development	RESTful APIs, JWT Authentication, API Endpoints, Request Validation, Serialization
Databases & ORM	PostgreSQL, MySQL, SQLite, Django ORM
Core Concepts	Object-Oriented Programming (OOP), CRUD Operations, Authentication & Authorization, Role-Based Access Control (RBAC), Database Modeling, Query Optimization, Debugging
Tools & Platforms	Git, GitHub, Visual Studio Code, Postman, PythonAnywhere

PROFESSIONAL EXPERIENCE

Junior Backend Developer

March 2026 – August 2026

Nexrupt Technologies · Lahore, Pakistan · 6 Months Professional Experience

- Developed and maintained backend applications using **Python** and **Django**.
- Built and integrated **RESTful APIs** using **Django REST Framework (DRF)**.
- Implemented **CRUD operations**, **authentication**, **authorization**, and backend business logic.
- Worked with relational databases and **Django ORM** for data modeling and database operations.
- Tested and debugged APIs using **Postman** and resolved backend issues to improve application reliability.
- Used **Git** and **GitHub** for version control and collaborative development.

FEATURED PROJECTS

AUTOMOTIVE · LIVE PRODUCTION

Corona Nissan: Live Dealership Website

LIVE — 2026

Python · Django · Django REST Framework · PostgreSQL · REST APIs · Django ORM

- Developed backend **RESTful API endpoints** and backend services supporting live automotive dealership operations and lead capture workflows.
- Implemented secure request validation, data serialization, and **CRUD-based backend business logic** using **Django** and **Django REST Framework**.
- Managed relational database operations and queries using **Django ORM** and **PostgreSQL** to ensure reliable data handling for vehicle inventories and customer inquiries.

INDEPENDENT BACKEND PROJECTS

ISP Management System 2026

Python · Django · Django REST Framework · PostgreSQL · JWT Authentication · RBAC

- Architected a modular backend platform in **Django** and **Django REST Framework** for ISP operations and billing workflows.
- Implemented organization-level tenant isolation and **Role-Based Access Control (RBAC)** with custom permission classes to safeguard administrative and customer data.
- Developed secure **JWT-based authentication** and **RESTful API endpoints** for managing customer lifecycles, service subscriptions, and invoicing workflows.
- Modeled relational databases for network infrastructure, inventory, and field-support ticketing using **PostgreSQL** and **Django ORM**.
- Implemented audit logging and notification services to track system-wide operational events and improve accountability across multi-user environments.

Restaurant Management System 2026

Python · Django · Django REST Framework · PostgreSQL / MySQL · REST APIs

- Developed a centralized backend management platform for restaurant order processing, menu management, and inventory tracking.
- Modeled relational database structures for menu categories, menu items, customer accounts, and transactional billing.
- Built secure **RESTful API endpoints** with token authentication and role-based permissions, separating administrative functions from front-of-house staff operations.
- Implemented **CRUD functionality** and backend business logic to streamline order fulfillment, calculate billing totals, and maintain live inventory status.

HR Management System (HR Portal) 2026

Python · Django · Django ORM · PostgreSQL / SQLite · Session Authentication · RBAC

- Built a role-based human resource management portal in **Django** to separate administrative oversight from employee self-service capabilities.
- Implemented custom authorization logic and access-control middleware using **Django's permission framework** to enforce data visibility rules.
- Modeled relational database structures for departments, employee records, and access permissions, ensuring referential integrity via **Django ORM**.
- Developed secure administrative functionality and views while restricting employees to viewing and updating their authorized personal data.

EDUCATION

Bachelor of Business & Information Technology **2023 – Present**

Virtual University of Pakistan · Lahore, Pakistan

LANGUAGES

English: Professional Working Proficiency

Urdu: Native / Proficient
