PROFESSIONAL SUMMARY

Python Backend Developer specializing in Django, Django Rest Framework, and FastAPI, with experience building secure RESTful APIs, authentication systems, and scalable backend applications. Skilled in designing relational databases using PostgreSQL and SQLite, implementing JWT authentication and role-based access control (RBAC), and developing clean, maintainable, production-ready code. Proficient with Git/GitHub, Postman, and PythonAnywhere deployment, with a strong focus on performance, security, and scalable backend architecture.

TECHNICAL SKILLS

Languages: Python

Frameworks & Libraries: Django, Django REST Framework (DRF), FastAPI

Databases: PostgreSQL, SQLite, Django ORM

API Development: RESTful API Design, CRUD Operations, Authentication & Authorization, Role-Based Access Control (RBAC)

Tools & Deployment: Git, GitHub, PythonAnywhere, Postman

Concepts: MVC/MVT Architecture, Object-Oriented Programming, Version Control, Backend Debugging

PROFESSIONAL EXPERIENCE

Junior Backend Developer — Independent Self-Directed Projects

Oct 2025 – Present

Lahore, Pakistan

- Designed and developed backend web applications and RESTful APIs using Django, Django REST Framework, and FastAPI across multiple independent projects.
- Modeled and managed relational databases using PostgreSQL and SQLite, leveraging Django ORM for efficient, secure data handling.
- Implemented user authentication, authorization, and role-based access control to secure application endpoints and protect user data.
- Built and tested CRUD-based features and API endpoints, ensuring reliable request handling and data integrity.
- Deployed and maintained live applications on PythonAnywhere, managing environment configuration and troubleshooting production issues.
- Used Git and GitHub for version control, maintaining organized commit history and project documentation.

PROJECTS

ISP Backend Management System | Django, Django REST Framework, PostgreSQL/MySQL

- Developed a modular ISP backend system for managing customers, subscriptions, billing, inventory, and support operations.
- Built secure RESTful APIs with JWT authentication, role-based access control (RBAC), filtering, pagination, and API documentation.
- Designed scalable database models and reusable backend architecture to support maintainable and production-ready applications.

Authentication API / JWT System | Django REST Framework, JWT

- Developed a secure authentication system featuring user registration, login, JWT token authentication, password management, and role-based authorization.
- Protected REST APIs using permission classes and token-based authentication.
- Designed reusable authentication modules following clean architecture and security best practices.

HR Portal – Role Based Access Control System | Django, Django ORM

- Built a role-based HR management system with employee management, department management, and secure authentication.
- Implemented role-based access control (RBAC) to restrict system access based on user permissions.
- Designed relational database models and CRUD functionality for efficient employee data management.

Restaurant Management System | Django, Django ORM

- Developed a restaurant management system to manage menu items, customer orders, table reservations, and billing operations.
- Implemented CRUD functionality, relational database models, and secure backend logic using Django ORM.
- Designed scalable backend modules to streamline restaurant workflow and daily operations.

Python Q&A Chatbot | Python

- Developed a Python-based chatbot capable of answering programming-related questions using rule-based response processing.
- Implemented response filtering logic to improve answer relevance and maintain domain-specific accuracy.
- Structured the application using modular Python components for maintainability and future enhancements.

EDUCATION

Bachelor of Business & Information Technology *2023 – Present*

Virtual University of Pakistan, Lahore, Pakistan

CERTIFICATIONS

- Python Essentials 1 — Cisco Networking Academy / Python Institute (April 2026)
